DIV. OF OIL, GAS & MINING

Subject: Access Road Maintenance Notice

Dear Mr. Kunzler

On or about September 1st 2016, I did some road improvement work on my property in Box Elder County. The property has a road through it which is used as the primary access to our other plots of land further up the road as well as for access to our active quartzite mine. The mine is about 3 miles further up the road from the spot where the road needed improved. I realized there was approximately 600 yards of old road (T14N R 17W Sec 33 SLB+M) in the bottom of a drainage that was erosion prone and on an uneven and steep grade. This section has been unnecessarily difficult for all users on the road, especially trucks which have tended to spin their tires here due to the condition of the road. In order to fix the problem I shifted the road to the West a few yards and fixed the grade to a more even 9% compared to the previous 8-14% grade. The next day I reclaimed the entire abandoned section of the old road. Please see the attached Map 1 and Map 2 for more details.

Sincerely,

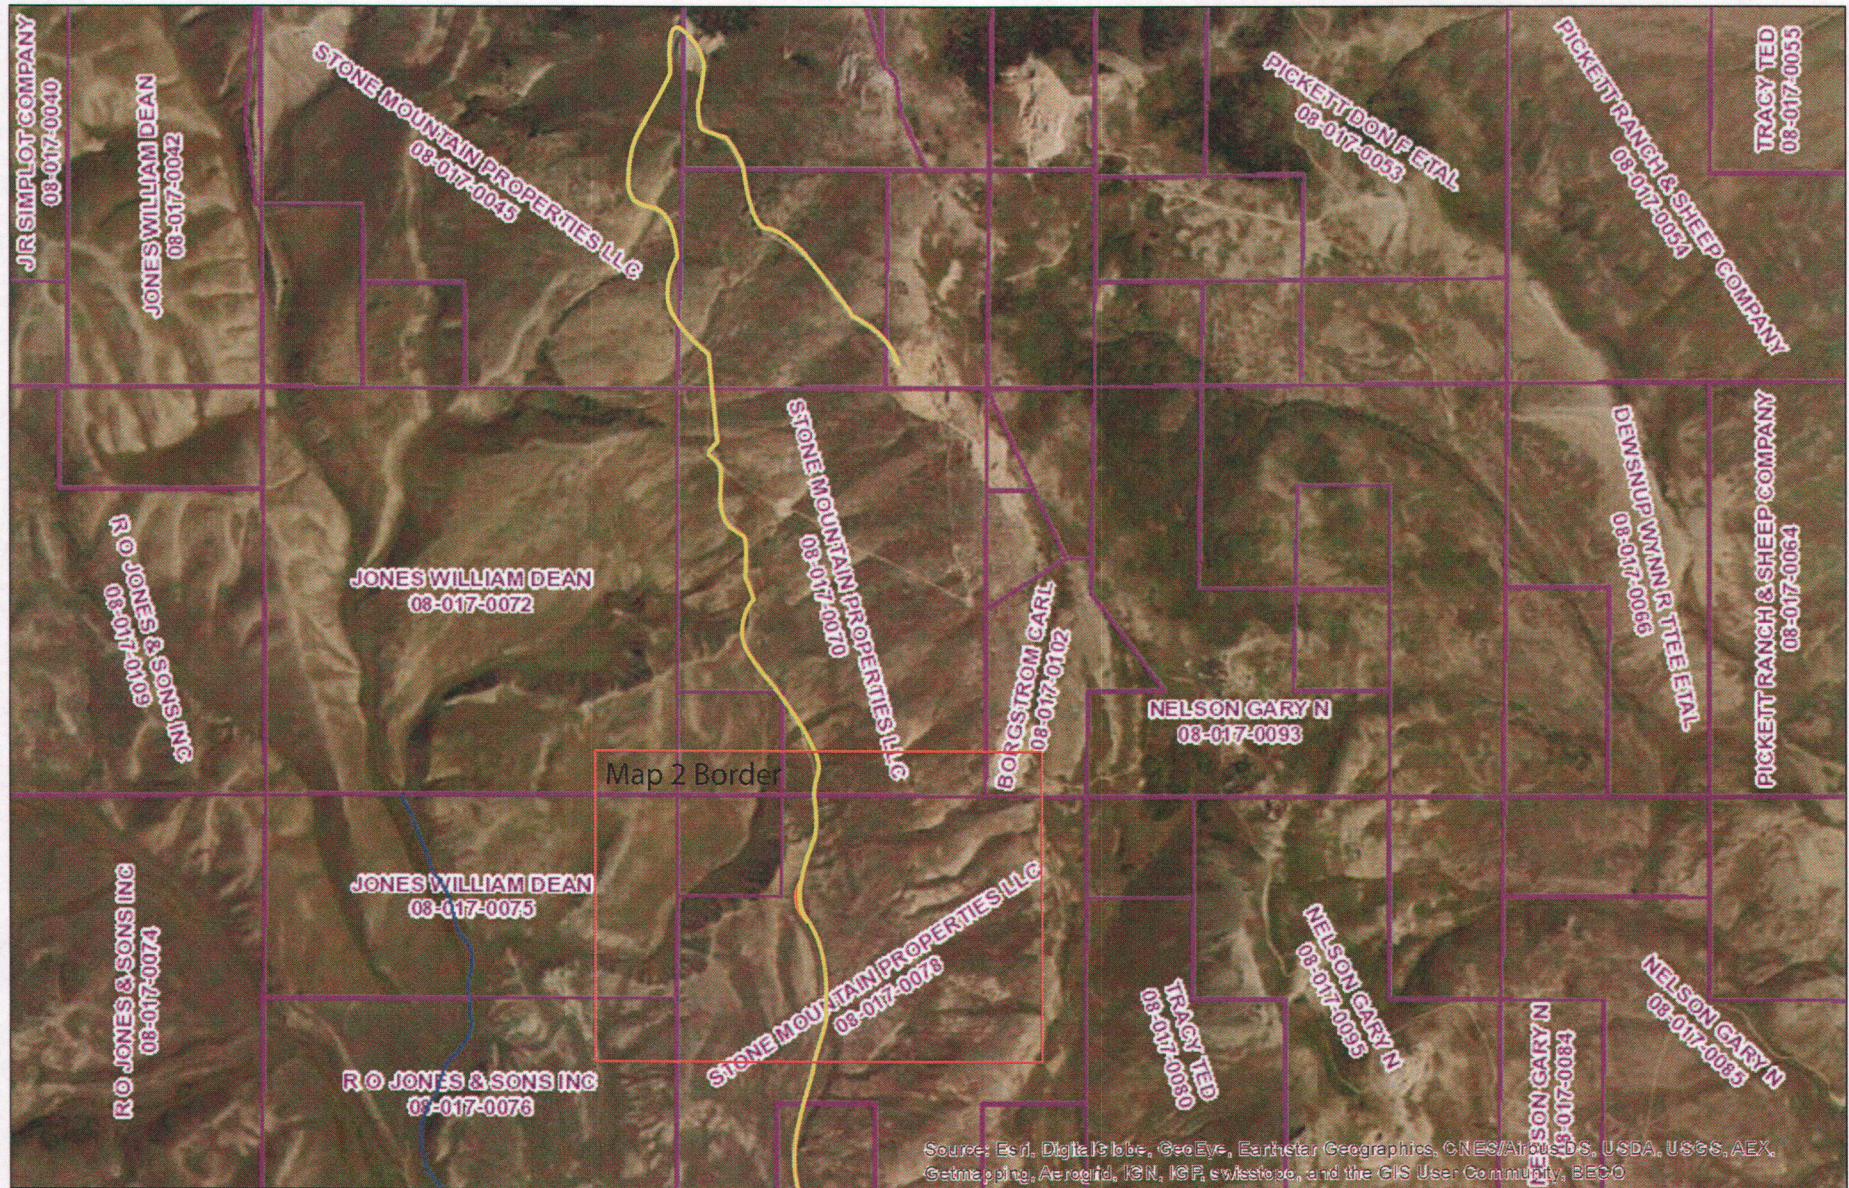

Lon A. Thomas
President
